

# December 2021 Custom Activity

Grades 3-5

Create custom lessons or timed tests that will be visible to your entire class! When you create a Custom Test, your students will be able to see it under "Custom Lessons" on the Lessons page. Break the lessons into multiple screens and keep students engaged!

**STEP 1** Log in to your Teacher Portal [HERE](#).

**STEP 2** Hover over the plus sign icon on the top-right corner, and click "Create a Custom Lesson/Test"

**STEP 3** Enter the required information, and then click "Save."

When your students log in, they should be able to see the lesson(s) you just created. If they were already logged in, they will need to log out and log back in to see them.

## YOUR CUSTOM TYPING CONTENT:

The climate in Antarctica can be so cold that you might think nothing could survive there. However, many animals have adapted to live in this chilly environment. Orcas and seals have thick layers of blubber, or fat, to help keep them warm. Emperor penguins have 4 layers of feathers to protect them from icy winds and extreme cold. Perhaps the most impressive cold-weather animal is the arctic tern, which flies from the north pole to the south pole every year to avoid the coldest months.
